Ingredients according to INCI:	CAS-nr.:	%																																																																				
Aqua	7732-18-5	40-80																																																																				
Cetearyl alcohol	67762-27-0	5-10																																																																				
Glycerin	56-81-5	5-10																																																																				
Lanolin	8006-54-0	1-5																																																																				
Isopropyl palmitate	142-91-6	1-5																																																																				
Polysorbate 60	9005-67-8	1-5																																																																				
Sorbitan stearate	1338-41-6	1-5																																																																				
Caprylyl glycol	1117-86-8	1-5																																																																				
Panthenol	81-13-0	< 1																																																																				
Propylene glycol	57-55-6	< 1																																																																				
Perfume																																																																						
Aloe barbadensis	85507-69-3	< 1																																																																				
Alpha-methyl ionone	127-51-5																																																																					
Citral	5392-40-5																																																																					
Dipentene	5989-27-5																																																																					
Geraniol	106-24-1																																																																					
Hexyl cinnamal	101-86-0																																																																					
Hydroxycitronellal	107-75-5																																																																					
Butylphenyl methylpropional	80-54-6																																																																					
Linalool	78-70-6																																																																					
Citronellol	106-22-9																																																																					
Hydroxyisohexyl 3-cyclohexene-Carboxaldehyde	31906-04-4																																																																					
3. Hazards Identification	There is no danger associated with the common usage of the product. The product is cosmetics and a safety evaluation has been made.																																																																					
4. First-aid measures	<table border="0"> <tr> <td style="vertical-align: top;">General:</td> <td>Seek medical attention in case of doubt or if discomfort continues. Bring this material safety data sheet. The doctor may contact the UK National Poisons Emergency number at 0870 600 6266</td> </tr> <tr> <td style="vertical-align: top;">Eye Contact:</td> <td>Remove any contact lenses. Rinse thoroughly with water.</td> </tr> <tr> <td style="vertical-align: top;">Ingestion:</td> <td>Rinse mouth thoroughly with water.</td> </tr> </table>	General:	Seek medical attention in case of doubt or if discomfort continues. Bring this material safety data sheet. The doctor may contact the UK National Poisons Emergency number at 0870 600 6266	Eye Contact:	Remove any contact lenses. Rinse thoroughly with water.	Ingestion:	Rinse mouth thoroughly with water.																																																															
General:	Seek medical attention in case of doubt or if discomfort continues. Bring this material safety data sheet. The doctor may contact the UK National Poisons Emergency number at 0870 600 6266																																																																					
Eye Contact:	Remove any contact lenses. Rinse thoroughly with water.																																																																					
Ingestion:	Rinse mouth thoroughly with water.																																																																					
5. Fire-fighting measures	Fire extinguisher: All extinguishers may be used.																																																																					
6. Accidental release measures.	No special steps are necessary.																																																																					
7. Handling and storage	Storage: Best at 0-30°C.																																																																					
8. Exposure controls / personal protection	The product requires no special exposure control.																																																																					

DATA SHEET HANOCURA

9. Physical properties	Colour: White Physical State: Cream Odour: Scented Solubility description: Emulsifies in water Boiling point: Value: 100°C Density: Value: 990 kg/m ³ Viscosity: Value: 45.000 -55.000 cps at 20°C pH: Value: 6,4 – 7,5
10. Stability and reactivity	The product is stable under normal conditions of use.
11. Toxicological information	Eye Contact: May cause irritation, redness and sting. Ingestion: Causes irritation of mouth and gastrointestinal tract.
12. Ecological information	Persistence/Degradability: The product is considered to be readily degradable Bioaccumulative potential: The product is not expected to be bioaccumulating.
13. Disposal	EWC Waste Code: EWC: 070699 wastes not otherwise specified, National waste code: 19.00, National Waste group: H
14. Transport information	The product is not dangerous goods. No special information are required for transport.
15. Regulatory information	Manufacture and use of the product is regulated according to the EC-directives on cosmetics.
16. Other information	Application: The product is used for the regenerating and care of the skin. Suitable for dry skin. Directions for use: Apply on clean and dry skin after work. Shelf life: 30 months.
