

Biological Urinal Screen & Block

DESCRIPTION

Our Urinal Screen with Biological Blocks have been specially formulated to reduce odour problems and blockages in urinals. New strains of bacteria have been introduced to the biological and enzymatic cleaning efficacy to remove fats, uric-scale and solids that build up in urinal traps and pipe-work causing odours and blockages. Citrus perfumed and water soluble, The Biological Blocks efficiently eradicate the source of this problem, providing substantial savings on both washroom maintenance and water bills as the need for constant flushing and more regular cleaning is reduced.

TECHNICAL INFORMATION

In Screen Biological Urinal Blocks contain a selection of non-pathogenic (harmless) micro-organisms a blend of cleaning and water-softening agents, a special odour-blocking perfume & colour. Nominal working life of block is one month
